SFS Browser  
Download

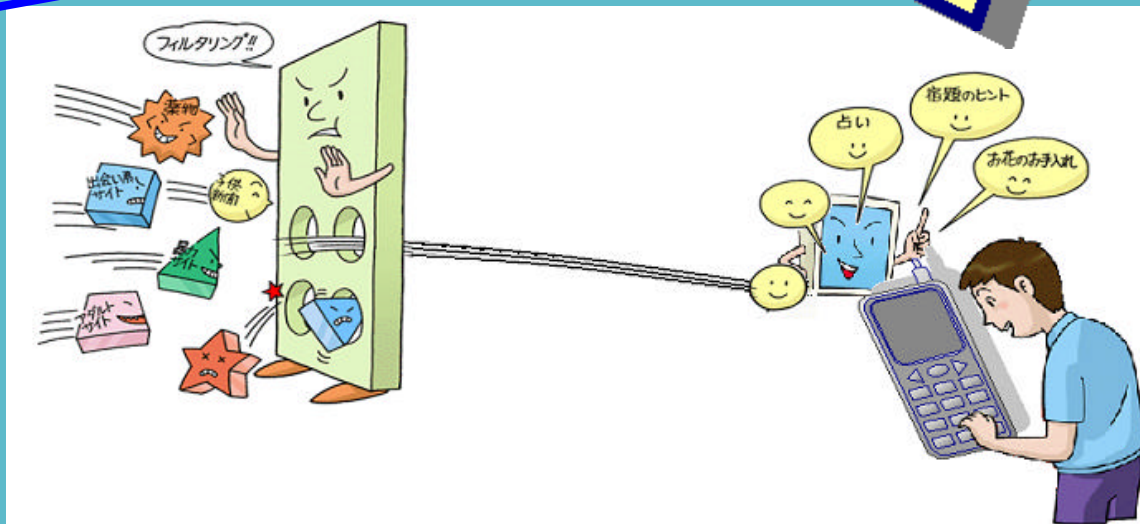

<http://rf.iajapan.org:8141/i/ib.html>

Parents can download a suitable SFS browser (i-appli written in Java) into children's mobile phones.

Mobile phones have become very useful with Internet access capabilities. However, there is a possibility that children could come across harmful content with mobile phones.

The SFS browser filters harmful content via the mobile SFS.

The SFS browser was developed to demonstrate filtering of harmful content accessed with mobile phones.
